

Accessibility

The website conforms to the W3C Web Accessibility Initiative Guidelines to Level A. These guidelines serve to promote accessibility of websites to users with disabilities and to make web content available to all users, regardless of the user agent they are using or constraints they may be operating under.

Our site has been automatically checked against these standards, using the Bobby and Cynthia online validation services, and passed the Priority 1 (Level A) compliancy tests. We have also manually checked the site to ensure compliance.

This site has been tested using as many browsers as possible and on differing operating systems, but the look of the site may vary slightly between these. If you are using an older browser you may not be able to see the site fully formatted but will still see the content of the site displayed in a readable form. If you have any problems in using the Dates-That-Clash Site, please let us know at accessibility@datesthatclash.com. We welcome any feedback that will help us to improve the accessibility level we can offer.

Adjusting Text Size in various browsers:

Please select your browser below to have find out how to have more control over the text size.

Select your browser:

Internet Explorer

Netscape

Opera

Firefox (formerly Firebird)

Safari

Changing text size in Internet Explorer

To adjust the text size:

1. Select menu item View / Text Size
2. Click on the desired size. (The dot indicates the one currently selected.)

You can also adjust the text size quickly by holding the Ctrl key down and moving the mouse wheel.

To adjust the font:

1. Select menu item Tools / Internet Options;
2. Select the "General" tab;
3. Press the "Fonts" button;
4. Select the required font;

5. Press the "OK" button;
6. Press the "OK" button.

Changing text size in Netscape

1. Select menu item Edit / Preferences;
2. Select item Appearance / Fonts;
3. Select the fonts and size required (the one marked "variable width" or "proportional" is the most important one);
4. Press the "OK" button.

Changing text size in Opera

In Opera 8:

1. Select menu item Tools / Preferences (or press Alt-P);
2. Select tab Web pages;
3. Click the button next to "Normal font";
4. Select the font and size you like;
5. Press the "OK" button (or the Enter key);
6. Press the "OK" button (or Cancel, if you've suddenly got cold feet).

You can control fonts in more detail on the "Advanced" tab.

In Opera 7 this is to be found under menu item File / Preferences, then "Fonts and Colors", then "Normal";

In Opera you can also rapidly zoom in and out on a page, if you have a mouse with a wheel: hold the Ctrl key depressed, and move the mouse wheel up or down. Or use the "+" and "-" keys on the numeric keypad, and "6" to return to 100%.

In Opera you can also set a minimum text size, so if a site uses some reasonable-sized text and some tiny text, you can force the tiny text to be readable. This is set in the "Advanced" panel, as above.

[Shortcut Keys](#)

Each main section within the navigational menu has a shortcut key associated with it. These keys can be accessed using a combination of keyboard options on most new browsers.

Windows users should press and hold the ALT key followed by the underlined letter (sometimes you may need to press the ENTER key after this as well). Macintosh users should press and hold the Control key followed by the underlined letter.
